

New ISU System of 3 Components

Attention: Section Coaches

Please see the attached information concerning the new ISU system of 3 components.

At the recent 2022 ISU Congress, the introduction of three Program Components (PCs): Composition, Presentation, and Skating Skills was approved. This change to three PCs will be implemented internationally starting with the upcoming 2022-2023 season. After a review of the impacts of this change on our domestic categories, Skate Canada has decided it will be implementing the new PCs for all domestic categories scored using the Cumulative Points Calculation (CPC) system. This includes Podium Pathway, STAR, Adult and Special Olympics categories.

The updates to Skate Canada's Competition Scoring System are underway and changes will be implemented at the Summer competitions. If you have skaters competing at summer events please read and review all of the attached information as it will help you and your skaters. Communication on the changes will be distributed to all Skate Canada stakeholders over the coming weeks through the Notice Board and Inside Edge. Please be vigilant in looking for any updates on these two sites!

As a good place to start ... read the New Components Chart and then read the profiles of each of the components. The Video summary should be viewed prior to viewing the videos as it will give you a sense of what is to come. There are 9 video links. It will take you approximately an hour for each one and they are an excellent resource for you. If you have any questions regarding this information please contact me.

It is a lot of information especially when you have just entered your summer programs so enjoy a cup of something and settle down in a comfy spot to review Allow yourself time, it is not a crammable item!
Enjoy it is worth the effort to study this.
